Lake Garnett Grand Prix Revival

is a tribute to the history of Lake Garnett Race Track from the 1950's and 1960's. In 2013, out of personal desire to hear cars screaming around the track, CB Harris, his wife Cheryl, and a small band of volunteers hosted a tribute to the racers, cars and events of past. This event was a huge success, so much so that the participants and the city requested that the event become an annual event. This was the birth of the Lake Garnett Grand Prix Revival.

Spectator Area #1

Rides For Charity

"From proceeds of its first two years, LGGPR has distributed over \$5,000 to well-known local charities – already a worthy tradition."

Track Event Groups

Group A - Top speed of 60 mph.

This is the gentlemen's group. There will be spirited driving if you like, but at a slower, more relaxed pace. Drive here if speed isn't your thing.

Group B - Top speed of 80 mph.

Spirited driving with some cars at the limit of their performance, at 80 miles per hour on the straights. This group will have powerful cars but limited track experience drivers.

Group C - Top speed of 100 mph.

This group consists of cars that can easily get up to 100 miles per hour, have good handling and brakes, and will have drivers that want to test their skills.

Group V - Vintage Race Cars.

This group will feature vintage race cars from the past. Cars in this group will be the old, fast sports cars

Group H - Historic Sports Cars.

This is a very unique group of older and slower, factory stock cars produced prior to 1960.

Group E - Modern Race Car Exhibition.

This is an exhibition group reserved for race cars and drivers with racing certifications. This group is by invitation or application with acceptance only. This group will operate under more stringent rules aligned with established racing event rules - even though this group will not be racing!

The annual Lake Garnett Grand Prix Revival is a full weekend for car enthusiasts and their families.
